Personal goal : Albin Biju

To become an expert full stack web developer (MERN, MEAN, Django, springboot) within 1 year

Strategy 1

Watching youtube videos from channels like netninja, freecodecamp, brototype etc (1hr per day)

- Will be able to understand the core concepts

Strategy 2

Working out the understood concepts in real projects

- Will gain practical experience

Strategy 3

Trying out new things and resolving errors occurred

- Will get deeper understanding and learn new things

Strategy 4

Getting help from seniors when stuck at learning something

- Will be able to gain more skills from seniors which might don't know

Team goal:

Learn java , html , react, leadership and communication skills in the next 5 months

Strategy 1

Learning via internet resources

- Spend 1 hr per day for researching about the concerned topics

Strategy 1

Learning via sharing

- Sharing the topics studied by each person on a weekly basis by meeting and via virtual team meeting
